DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 92-106, 110-117 drawn in part to FSH or FSH variant, method of treating, process of preparing and article of manufacture.

Group II, claim(s) 118-131, 133-140 drawn in part to FSH or FSH variant wherein FSH or FSH variant comprises 90% FSH, method of treating, process of preparing and article of manufacture.

Group III, claim(s) 118-131, 133-140, drawn to in part to FSH or FSH variant wherein FSH or FSH variant comprises dimers, method of treating, process of preparing and article of manufacture.

Group IV, claim(s) 92, 107-109, drawn in part to FSH or FSH variant.

Group V, claim(s) 118, 132, drawn in part to FSH or FSH variant dimers.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is FSH or FSH variant with preservative. The special technical feature of Group II is FSH or FSH variant (90%) with a phosphate buffer. The special technical feature of Group III is FSH dimers. The special technical feature of Group IV is FSH variant. The special technical feature of Group V is FSH variant dimers. The Groups are directed to products that are distinct both structurally and functionally and

Art Unit: 1647

are not required one for the other and therefore are patentably distinct. In addition Groups I and II are drawn to the product, method of treating, process of preparing and article of manufacture. PCT rules do not provide for examination of multiple methods of using the first claimed product.

Furthermore, if Group IV or V is elected, Applicant is required to elect one SEQ ID NO: for the α -subunit and one SEQ ID NO: for the β -subunit. PCT Rules provide for examining one product, one method of making and one method of using the product. Different sequences constitute different products, since they have diverse sequences, coding regions and/or impart structural and functional differences.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
